

“...delivering top-tier talent...”

### **Eagle Network Solutions Hires Business Development Strategist & Engineer, Jesse Jones**

#### *ENS Engineer Certified in Information Assurance*

BURLINGTON, VERMONT/MISAWA, JAPAN, October 2nd, 2007 – Eagle Network Solutions, LLC announced today that ENS Engineer Leonard Shaw earned a Global Information Assurance Certification in Security Essentials.

“Information assurance has become the most critical and, dangerously, one of the most widely misunderstood aspects of our market. We’re glad that Leonard took the opportunity to get his GIAC certification. An international benchmark and a standards-based approach to IA are critical components to developing secure infrastructure. GIAC provides both” said Jason Zuliani, Partner and Director of Business Development at Eagle Network Solutions.

Shaw earned his Global Information Assurance Certification (GIAC) in Security Essentials. The examination covers a wide range of Information Assurance topics and is considered by many businesses and government agencies to be the most trusted benchmark of an individual’s IA knowledge. Shaw began working with ENS in September of 2006. He is currently stationed in Japan supporting the Missile Defense National Team.

#### **About Eagle Network Solutions:**

Eagle Network Solutions is a Vermont-based telecommunications firm delivering top-tier talent and reliability to the Federal Government and Federal Prime Contractors. ENS provides a full suite of staffing services as well as engineering consultation and planning, and specialized technology resale services. From Japan to Washington, DC, ENS personnel are currently staffing positions on programs critical to the safety and well being of our country.
