

“...delivering top-tier talent...”

Eagle Network Solutions Hires Business Development Strategist & Engineer, Jesse Jones

New addition brings a wealth of new business development possibilities to the growing Vermont technology firm

BURLINGTON, VERMONT, September 14th, 2007 – Eagle Network Solutions, LLC announced today that it has added noted engineer and business development strategist Jesse Jones.

“We’re happy to have found somebody with Jesse’s unique combination of advanced technical skills and business savvy.” said Jason Zuliani, partner and Director of Business Development at ENS. “Jesse brings a deep strategic awareness of the defense industry to ENS. This, along with his excellent client-side relationships and engineering expertise make him a compelling addition to our company. We’ve already begun to lay the groundwork for the next several years of strategic business development.”

Jones’ work history is starred with numerous technical and developmental successes, including a recent position with General Dynamics Information Technology where he was the C2 Infrastructure Lead on the Pentagon Infrastructure Renovation Program and Senior Principal and Architect for the Senate enterprise converged services and VoIP proposal efforts.

Jones will work closely with Eagle Network Solutions client Lockheed Martin as a member of the Missile Defense National Team. He will also work in conjunction with Zuliani on the planning and execution of several business development initiatives, including a business unit with a focus on the sale of tactical communications devices and other specialized strategic technologies.

About Eagle Network Solutions:

Eagle Network Solutions is a Vermont-based telecommunications firm delivering top-tier talent and reliability to the Federal Government and Federal Prime Contractors. ENS provides a full suite of staffing services as well as engineering consultation and planning, and specialized technology resale services. From Japan to Washington, DC, ENS personnel are currently staffing positions on programs critical to the safety and well being of our country.
