**Eagle Network Solutions Receives NETCENTS Contract Award from
General Dynamics Network Systems**

Burlington, VT/ Needham, MA April 12, 2004 – Eagle Network Solutions has been selected by General Dynamics Network Systems to participate in the US Air Force NETCENTS contract. Eagle Network Solutions is a Vermont-based data networking and telecommunications firm.

The multi-billion dollar NETCENTS award is intended to provide the United States Air Force with extensive upgrades to network-centric war fighting systems, as well as administrative and support systems. The \$9 billion dollar award is expected to give the Air Force the type of institutional and contractual flexibility required to maintain a robust and secure infrastructure.

Eagle Network Solutions provides General Dynamics with subject matter expertise in fields such as data-network engineering, network security, infrastructure development and design, and platform standardization.

About Eagle Network Solutions:

ENS is a Burlington, Vermont-based technology engineering and research firm with a focus on critical voice, video, data and convergent networks. A unique complement of extensive process-based laboratory research experience with extensive field-based practical deployment, operations and maintenance allows ENS to employ a comprehensive approach to any network-centric solution. Deep expertise in emerging technologies and the integration of these technologies with existing infrastructure keeps ENS poised to design, test and build networks capable of delivering robust, secure and dynamic data and media content. ENS solutions revolve around open standards of interoperability suited to the development of joint tactical platforms of communication.
